Construction

FLEXIBILITY - standard modules of 450 and 900 mm allow us to set up a lab and easily reconfigure it to suit future needs.

LONG LASTING electrogalvanised steel construction with 1.0 mm thickness with a heavy powder coated finish for a lush look that will last years in robust laboratory environments.

SLIDING KNEE SPACES - this makes it incredibly flexible on site, it can be adjusted at site to suit local construction conditions. A very forgiving set up.
